

Water Sourcing

Edgebrook Golf Course

Primary Goal

To establish a long-term and sustainable water source for the Edgebrook Golf Course that will address the current and future water needs of the course.

Options Explored

- Capture Runoff from the north side
- Capture runoff from the west side
- Connection and pumping from L.G. Everist Site
- Expand the holding ponds and drain tiles through the course
- Purchasing treated water directly from BMU
- Additional (6) well sites we explored at Edgebrook Golf Course

Current Options

1. City owned and operated well south of the golf course
 - Status – 4 test wells were explored. One was found to be viable at 300-350 gpm.
2. Connection to existing well at Southbrook Softball
3. Connection to BMU Raw Water Line

Timeline & Next Steps

- Cost Estimates for all 3 options – Early 2025
 - Land Acquisition, if applicable
 - Water usage rates, if applicable
 - Construction estimates
- Final Recommendation – Early 2025
