To Whom It May Concern:

As to the matter of my request to allow for the crushing of concrete on my property located at 21625 471st Ave., Brookings, SD 57006. I, Andrew Austreim, submit the following plan:

1. Traffic management will be insignificant as this operation will not generate any extra road traffic and therefore this is a moot point.
2. Dust control will consist of keeping all surrounding crushing areas moist and therefore minimizing dust emissions. If weather becomes a factor, and we are unable to control dust from traveling to neighboring dwellings, we can postpone the operation until a more favorable weather day.

Respectfully Submitted,

Andrew Austreim
