Item #4 - Airport Manager's Report – DOT airport inspectors were at the airport to complete an inspection. Everything looked good and there were no issues. Klocker asked if the terminal ramp rating had been lowered, Dahl has not received any word on this. There are some cottonwood trees that were part of a discussion but are not an issue at this time. They could be in the future so staff will look at taking care of them before they become too large. The Airport Conference in March of 2025 is scheduled in Deadwood again. Repairs have been made on the fuel pump system, replacing the glass on the digital reader. Recently the pumps were not working but repairs were made and the pumps are up and running again. The concrete for the new hangar is being poured. The building should arrive next week for construction. The haying has not been complete yet.
