

We are a family/household of eight (8). At all times, there are at least six (6) vehicles to be parked, with the potential for eight (8) vehicles to be parked at one (1) time. We are requesting to add an addition to the driveway to accommodate safe parking for our family. This will not only be helpful for winter months to get as many vehicles off the street for proper snow removal but also for the safety of our children due to the high traffic on our side street (10th St S) that may at times cause blocking. We do try to have our kids park on one (1) side of the street but there are other individuals in our area that park on the opposite side of the street and at times this can cause a one (1) lane street for traffic.

We are under the impression that we can add a driveway coming in from 10th St S; however, that would be a more exceptional price and would involve removing grown trees from our yard.

In the end, we are looking for this variance for the safety of our family, the public, and off-street parking in the winter months, especially during snow removal. As of right now, we do not have enough room to get all vehicles off the road safely.
