South Dakota State Law SDCL 1-19A-11.1 Review Required

- SDCL 1-19A-11.1 requires local governments to extend certain protections to historic properties listed on national, state or local registers.
- Local governments are not to issue a permit for any project that would encroach upon, damage or destroy a designated property if there is a feasible and prudent alternative that would prevent such encroachment, damage or destruction.
- Projects subject to review under SDCL 1-19A-11.1:
 - 1) Any project which requires a permit and involves the exterior of a structure within a historic district
 - 2) Any project which requires a permit for demolition or moving and which is within a historic district or listed on the National Register
 - 3) Other: Rezoning, conditional use permits, street vacations

Applicant Name: FB&T Community Development Corporation (Rick Lee - President) Date: 09.20.24

Project Address: 919 4th Street, Brookings, SD 57006

Mailing Address: P.O. Box 5057, Brookings, SD 57006

Cell Number: 605-695-8253 Email: rick.lee@bankeasy.com

Historic District:

- University Central Sexauer Commercial Individually Listed

1) General Project Description: _____
919 4th St. project (Contributing)

This project involves the home located at 919 4th St. in Brookings. FB&T Community Development Corporation (CDC) purchased this home on August 29, 2023 with the intention of putting in a new basement, remodeling and then listing for sale to the public. Once we took control of the home and assessed the magnitude of this remodel it was determined this home cannot be saved on a budget fit for resale. I did reach out to Milbank House Movers to determine if this home was a candidate for a new basement. They mentioned the east half of the home would more than likely fall apart during the process. I did have a gentleman reach out and would like his rental home moved to this lot if all approved. This home is in the historical district (non-contributing) located at 415 Medary Ave, Brookings just two houses down from this home. The plan would be to move a home on to this location whether it be the Medary home or not.

2) Do you plan to repair the historic original materials? Yes No

3) What method will be used in treatment of the historic original materials?
The CDC intends to demolish the structure located at 919 4th St. in Brookings and replace with a home in the future.

Standard #7: Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.

- 4) If the proposal includes removal of any historic original materials or exterior features or spaces, provide documentation as to the condition of the original materials and reasons for removal.

The CDC intends to demolish the structure located at 919 4th St. in Brookings and replace with a home in the future.

- 5) If new materials are proposed, what materials will be used?

Proposing to relocate a home located in Brookings.

- 6) If new materials are proposed, what alternatives were considered?

Proposing to relocate a home located in Brookings.

Include a narrative of all feasible and prudent alternatives that have been considered for the project, describing how all possible efforts have been made to minimize harm to the historic property, including the reasons for rejection.

State of South Dakota Administrative Rule 24:52:07:03: "Alternatives must be based on factual reports, research, tried methods and professional and lay preservation advice. They must also be based on professional assessments of the value and basic structural condition of the affected property and estimates of a range of rehabilitation or mitigative options prepared by people experienced in historical preservation work.

- 7) Is replacement of missing features proposed? If so, substantiate with documentary, physical, or pictorial evidence.

Nothing proposed.

Standard #2: The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

Standard #6: Deteriorated historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.

- 8) Is the project attempting to qualify for State Property Tax Moratorium or Federal Tax Credit?

Yes No

- 9) Does the proposal involve removal or moving of a structure? Please include a narrative of all feasible and prudent alternatives that have been considered for the project, describing how all possible efforts have been made to minimize harm to the historic property, including the reasons for rejection.

This project would involve the demolition of the home at 919 4th St. in Brookings. We would then move a home on the lot in the future.

We may have a home ready to go but still would need to work out the details of that transaction. The home is located now at 415 Medary Ave., Brookings. I did contact Milbank House Movers to see if it was possible to lift the original home and put in a new basement. They don't think that will work as the east side of the home would not fair so well.

10) Is an addition or new construction proposed? If so, please describe and include drawing/schematics with proposal.

- Site plan drawn to scale showing the existing structure(s) and proposed improvements. The site plan should clearly create a graphic representation of the building footprint(s) and any other elements that are part of the request.
- Elevation sketches drawn to scale showing the proposed changes including description of materials to be used (materials plan).

The plan would be to remove the existing structure and then replace with another existing structure from Brookings. All details have not been finalized. The pictures attached do not show the problems with the home as they are structural in the basement. Home leans from west to east due to damaged, old basement walls.

REFER TO State of South Dakota Administrative Rule 24:52:07:04, Standards for New Construction and Additions in historic districts, for additional guidance <http://sdlegislature.gov/rules/DisplayRule.aspx?Rule=24:52:07:04>.

Standard #9: New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

Standard #10: New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

HISTORIC STANDARDS

Secretary's Standards for Rehabilitation: The Standards apply to historic buildings of all periods, styles, types, materials, and sizes. They apply to both the exterior and the interior of historic buildings. The Standards also encompass related landscape features and the building's site and environment as well as attached, adjacent, or related new construction.

- 1) A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.
- 2) The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.
- 3) Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, shall not be undertaken.
- 4) Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.
- 5) Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a historic property shall be preserved.
- 6) Deteriorated historic features shall be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.
- 7) Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.
- 8) Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.
- 9) New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.
- 10) New additions and adjacent or related new construction shall be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

SUBMIT THE FOLLOWING

- Completed Historic Preservation 11.1 Review application form and additional narrative, if needed.

- If historic materials are to be removed, email color digital photos of the existing structure/property that include:
 - Street frontage
 - All areas affected by the proposed project
 - Photos of rot or decay of element to be replaced or repaired
 - Photos of neighboring properties

Send to: Rmiller@cityofbrookings-sd.gov

- If an addition or new construction is planned, submit a site plan drawn to scale showing the existing structure(s) and proposed improvements. The site plan should clearly create a graphic representation of the building footprint(s) and any other elements that are part of the request.

- If new materials are proposed, submit sketches drawn to scale showing the proposed changes including description of materials to be used (materials plan).

(Attach additional sheets as necessary)
