Action on Resolution 17-090, a Resolution in support for a State Transportation Alternatives Program (TAP) Grant Request for a Bicycle Infrastructure Project.

Summary:

This resolution authorizes the City of Brookings' support for a State Transportation Alternatives Program (TAP) Grant Request for a Bicycle Infrastructure Project. The proposed project is the LeFevre Drive Allyn Frerichs Trail Connection.

Background:

The SDDOT has a Transportation Alternatives (TA) Grant Program that uses Federal Transportation Funds for specific activities that enhance the intermodal transportation system and provide safe alternative transportation options. TA replaces the former Transportation Alternatives Program (TAP) and includes projects and activities such as pedestrian and bicycle facilities, recreational trails, Safe Routes to School projects, community improvements such as historic preservation and vegetation management and environmental mitigation related to storm water and habitat connectivity.

Approximately \$2.1 million is available through a competitive grant process administered by the SDDOT, and each individual grant may be approved for a maximum of \$400,000 in Federal funds.

City staff examined a number of projects outlined in the Bicycle Master Plan and selected the LeFevre Drive Allyn Frerichs Trail Connection for the grant application; (Project #26 from the Bicycle Master Plan Project Priorities List). There are a number of reasons staff selected this project. During the community engagement sessions of the Bicycle Master Plan, the consultants heard comments that the hoteliers saw the value of promoting and increasing bicycling in the community in order to bolster the economic growth of the community. Many of the local hotels are currently located on the Allyn Frerichs Trail, which links visitors to the Dakota Nature Park as well as the Swiftel Center. One local hotel manager described visitors bringing their bicycles to Brookings when traveling for business. Some customers continue to stay at the Brookings hotel because they allow indoor bicycle parking, and have a trail that connects them to town. The master plan also stated there was desire to connect major destinations that currently feel cut off by bicycles due to busy roads was clear and

providing better connections from downtown with large employer campuses as well as the hotels was a priority.

The project proposal includes an 8' wide concrete shared-use path on the west side of LeFevre Drive, and the south side of the LeFevre Drive cul-de-sac. The City is also proposing to construct a 5' wide concrete sidewalk on the north side of the LeFevre Drive cul-de-sac at a later date using City funds. A map of the proposed project is attached. The proposed cost of the project is as follows:

Grant request:	\$157,725.00
City share (25%):	\$52,575.00
Total project cost:	\$210,300.00

Fiscal Impact:

The City's share of the project is \$52,575.00. The City is pledging a 25% match for the project, although the minimum match required is by the grant program is 18.05%.

Recommendation:

Staff recommends approval.
